If you have never tried skinless, bone-in chicken breasts before, this week's recipe is a must! I love this whole recipe so much because it allows for me to cook the chicken breast in the oven, letting it cook until crispy, while I take a shower. While you're cooking in the oven, you get to wash your dishes and relax at the same time. There is no soaking or pre-soaking of the chicken, which is always a plus. This is a different type of chicken, but it is so tender and juicy! If you're a fan of chicken breast, you will absolutely love this recipe! I chose to pan-fry the chicken with some herbs in my cast iron skillet. For just the right amount of flavor, I blended some Swiss cheese, so I could toss that on top of the chicken.

The best part of this recipe is that it is so simple to make and can be prepped in 30 minutes. That means less time cooking for you!
